

# REMEDIAL SITE ASSESSMENT DECISION - EPA REGION IV

Page 1 of 1

EPA ID: FLN000407555 Site Name: FLORIDA SMELTING COMPANY-BUFFALO AVE

State ID:

Alias Site Names: FLORIDA SMELTING COMPANY

City: JACKSONVILLE

Refer to Report Dated: 9/30/2005

County or Parrish: DUVAL

State: FL

Report Developed By:

Report Type: COMBINED PA/SI 001

1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because:

2. Further Assessment Needed Under CERCLA:

Low priority for further assessment

## Discussion/Rationale:

This site is one of two former Florida Smelting Co sites in Jacksonville. The Buffalo Avenue location's PA/SI showed that the site soils are contaminated. It has high (14,000 mg/kg) lead and PCB (460 ug/l) in the soils. Although TN&A's PA/SI report recommendation was to NFRAP this site, EPA will keep this site on CERCLIS until the contamination onsite is addressed to assist the District in compelling a cleanup at the site. This is based on the high concentrations of lead, the proximity of the site to residential properties and the responsibility of the site owners to remove the risk of contaminated soils. The District plans to send out a Chapter 62-780 letter and will keep EPA apprised of any response activities at the site. There are 20 workers on site.
